North Dakota Firefighter's Association
Certification System

TECHNICAL RESCUE

CERTIFICATION STANDARD

For the following specialties:

- Technical Rescuer (chapter 5)
- Rope Rescue Level I/II (chapter 6)
- Confined Space Rescuer Level I/II (chapter 7)
- Trench Rescue Rescuer Level I/II (chapter 8)
- Structural Collapse Rescuer Level I/II (chapter 9)

2013 Standard
16 Firefighter Life Safety Initiatives

1. Define and advocate the need for a cultural change within the fire service relating to safety; incorporating leadership, management, supervision, accountability and personal responsibility.
2. Enhance the personal and organizational accountability for health and safety throughout the fire service.
3. Focus greater attention on the integration of risk management with incident management at all levels, including strategic, tactical, and planning responsibilities.
4. All firefighters must be empowered to stop unsafe practices.
5. Develop and implement national standards for training, qualifications, and certification (including regular recertification) that are equally applicable to all firefighters based on the duties they are expected to perform.
6. Develop and implement national medical and physical fitness standards that are equally applicable to all firefighters, based on the duties they are expected to perform.
7. Create a national research agenda and data collection system that relates to the initiatives.
8. Utilize available technology wherever it can produce higher levels of health and safety.
9. Thoroughly investigate all firefighter fatalities, injuries, and near misses.
10. Grant programs should support the implementation of safe practices and/or mandate safe practices as an eligibility requirement.
11. National standards for emergency response policies and procedures should be developed and championed.
12. National protocols for response to violent incidents should be developed and championed.
13. Firefighters and their families must have access to counseling and psychological support.
14. Public education must receive more resources and be championed as a critical fire and life safety program.
15. Advocacy must be strengthened for the enforcement of codes and the installation of home fire sprinklers.
16. Safety must be a primary consideration in the design of apparatus and equipment.
16 Firefighter Life Safety Initiatives

The 16 initiatives, listed on the preceding page, address the 6 root causes of firefighter injuries, close calls, and Line of Duty Death.

1. Ineffective policies and procedures.
2. Ineffective decision making.
3. Lack of preparedness.
4. Ineffective leadership.
5. Lack of personal responsibility.

Courage to Be Safe .... So Everyone Goes Home program
Contact NDFA
At: 701-222-2799
The NDFA Certification Committee is a 12-member committee, which consists of 9- members from the North Dakota fire service; the committee members function as liaison between the fire service and the North Dakota Firefighters Association Executive Board. Members of the committee are:

- NDFA 1st Vice President
- State Fire Marshal
- (1) A member from the North Dakota Fire Chief’s Association that will serve a 2-year term.
- (1) A member from the North Dakota Fire Prevention Association that will serve a 2-year term.
- (1) A member from the North Dakota Instructor Society that will serve a 2-year term.
- (4) Four NDFA members at large, one member elected from each of the 4 training regions: NW, SW, NE, and SE: (their terms will mirror the Trustee from their region).
- (1) A member of the Fargo Fire Department (Delegated Authority).
- The NDFA Training Director will serve as compliance officer and serve the Certification Committee as a non-voting member of the committee.

**Appendix A - IN-HOUSE PROCTOR INSTRUCTIONS AND REQUEST FOR CERTIFICATION FORMS** 122
INTRODUCTION

The world we live in is changing so fast, and the many phases of the fire service are becoming so technical and complex that fire service training must be utilized to its maximum potential. Any overlap, fragmentation, and lack of basic structure must be eliminated. Standardization is the natural complement and necessity.

The fire service in North Dakota, through a state certification program, can meet the needs of future growth and establish uniformity through certification. We will then have more effective and efficient utilization of resources so as to provide the best possible fire protection service for all the citizens throughout the state of North Dakota.

The following certification requirements are based on the objectives listed in the National Fire Protection Association (NFPA) 1006 standard for Technical Rescuer Professional Qualifications, 2013 Edition, Chapters 5, 6, 7, 8, & 9 as verified and adopted by the NDFA Certification Committee.

Through these national standards and certification, firefighters and fire departments have a tool to measure specific levels of skills, abilities and knowledge. The NDFA Firefighters Certification Committee believe by participating in this certification program, firefighters and fire departments will be better prepared to provide quality life safety and fire protection for their communities.
CERTIFICATION REQUIREMENTS

Entrance Requirements:

Certification as a Technical Rescuer is a unique process. Qualification is specific to a specialty area. For qualification, a rescuer shall receive and complete training on the job performance requirements in Chapter 5 and Chapter 6.1 (Rope Rescuer – Level I). This is the prerequisite for all job performance requirements listed in all offered specialty areas (chapters 6.2 through 9). Technical rescuers will be identified by their specialty area and level of qualification (i.e., Rope Rescuer — Level I, Confined Space Rescuer—Level II, etc.).

Rescuers must:

a. Receive and complete a Department Training Record for the Technical specialty area.

b. Pass an "In House" practical skills examination.

c. Meet any other training requirements/prerequisites as defined by the Certification Committee.

d. Pass both written and practical skills Certification examination administered by evaluators appointed by the Certification Committee.

e. Request Technical Rescue Certification for the specialty area completed.

The NDFA acknowledges the importance of and need for entrance requirements as listed in the NFPA 1001, Standard on Fire Fighter Professional Qualifications. Many agencies and departments have existing policies, regulations, etc. already in place regarding these requirements. The handling of entrance requirements is a LOCAL MATTER, outside the authority and jurisdiction of the NDFA. The NDFA will not check, test, evaluate or determine how individual agencies meet these requirements. Some departments have found it necessary to waive any type of entrance requirements due to their own special needs. As a local decision, this is permitted. However, due to the amount of physical, mental and emotional stress inherent in this profession, the NDFA strongly recommends careful evaluation before altering or doing away with any existing entrance requirements.

Physical Fitness Requirements:

The requirements listed in NFPA 1001, Chapter 4 are:

1. Meet the minimum educational requirements established by the authority having jurisdiction.
2. Meet the medical requirements of NFPA 1582, Standard on Comprehensive Occupational Medical Program for Fire Departments.
3. Physical fitness requirements for entry-level personnel shall be developed and validated by the authority having jurisdiction. Physical fitness requirements shall be in compliance with applicable Equal Employment Opportunity regulations and other legal requirements.
The position of a Technical Rescuer is one that requires a high level of skill and knowledge. The training that is given to and received by the candidate should be of the highest quality and degree. All training received must meet the requirements of NFPA 1006 Chapter 5 and at least one specialty area (chapters 6-9, 2013 edition) and the skills as approved by the Certification Committee contained within the NDFA Standard. All training received must be documented and recorded in the Training Record. All testing for Technical Rescue will be conducted following the Policies and Procedures of the NDFA.

Training for Technical Rescue can be obtained by completing one of the following training courses or methods to qualify to take the state Certification examination.

- Technical Rescue course in one of the following Technical Specialty areas: Ropes, Confined Space, Trench, Structural Collapse. A Training Record as given in this standard must be completed for each person.

- Department Based Training – Departments can create their own Technical Rescue course which meets the requirements as outlined in NFPA 1006 Chapter 5, plus the chapter containing the Technical Specialty areas contained in Chapter 6-9, 2013 edition). A Training Record as given in this standard must be completed for each person involved in the department-based training.

The course material should be referenced to the following textbook to prepare the candidate to successfully pass the state certification examination.

**Written Objectives:**

The course material should be referenced to the following textbook(s) to prepare the candidate to successfully pass the State Certification examination.

Written objectives for Technical Rescue are covered in the following texts for each of the specialty areas:

**Chapter 6, Rope Rescue:**

**Chapter 7, Structural Collapse Rescue:**
- FEMA National US & R Response System, Structural Collapse Technician; and
- Jones and Bartlett, Brannigan’s Building Construction for the Fire Service, 4th Edition
- J&B Learning, Emergency Medical Responder, 5th Edition

**Chapter 8, Confined Space Rescue:**
- CMC, Confined Space Entry and Rescue, Revised 2nd Ed; and
- J&B Learning, Emergency Medical Responder, 5th Edition

**Chapter 9, Trench Rescue:**
- Jones & Bartlett, Trench Rescue Principles and Practice to NFPA 1006 and 1670, 3rd Edition
Manipulative Objectives:

There are numerous methods departments have used to help prepare their personnel for the written examination. Considering the elevated level of skill and knowledge that is required of a Rescue Technician, the Certification Committee recommends that the candidate participate in a comprehensive class and receive instruction on both manipulative skills and written requirements.

Each participant must be trained and evaluated in the performance of all manipulative skills as found in this certification standard.

Each of the manipulative skill objectives shall be completed swiftly, safely and with competence as defined below:

• **Swiftly** – Each manipulative skill objective must be completed within the allotted time.
• **Safely** – Each manipulative skill objective must be completed safely. Actions that could injure individual or damage equipment are unacceptable. Equipment should be checked prior to skill testing or training to see that it is safe and functional.
• **Competence** – Each manipulative skill objective is performed in accordance with the North Dakota Standard. This includes performing the proper steps as outlined in the respective JPR skill sheet. Competence will be measured in accordance with the NDFA manipulative skill objectives.
**Department Training Officers:**

For departments to enroll in the certification process, it is necessary for the department to assign training officers. It is recommended the department assign **at least two** personnel as training officers to coordinate and provide certification training.

Department training officers should be State Certified at the level they are teaching. In addition, the NDFA strongly recommends training officers be state certified at the Instructor I level.

Department training officers will be responsible for certification training. Their primary responsibility will be to teach, evaluate, and “In-House” test department personnel on the manipulative skill and evolution requirements for each level of certification training.

Departments who do not have certified personnel to act as training officers for certification training should contact the NDFA-Training Director at (701) 222-2799 for assistance in setting up and monitoring certification training.

**Department Training Records:**

Each candidate shall have a training record on file with the department, which indicates whether he/she has trained on all manipulative skill objectives. This record shall be signed off or initialed by a department training officer. Training records must indicate the date, instructor, and total number of hours trained for each manipulative skill objective. Departments shall use the one provided at the end of the section correlating to the standard for which he/she is attempting.

**Department "In-House" Comprehensive Examination:**

At the completion of the department’s manipulative skills training, the department is **required** to hold an “in-house” comprehensive examination for the level being trained. This is a comprehensive “In-House” test conducted by the department training officers or course instructors. This test is to ensure that skill mastery has been obtained from the beginning to the end of the training process, and to prepare participants for the state examination. Training officers may utilize other personnel to assist in administering the exam; however, all personnel assisting with the testing should be certified at the level they are “In-House” testing.

In-House testers shall follow the Tester Instruction sheet to provide for uniformity and fairness during the exam. It is recommended candidates be given two attempts at any skill. **If they fail on the second try, then they have failed the evaluation and are required to go through additional training by the department trainer.** No training, teaching, or coaching is allowed during the test. After the evaluation, using the test to teach and train is recommended.

If manipulative skill weaknesses are evident, the department shall conduct additional training and hold a new department “In-House” comprehensive examination. Only those candidates who successfully pass the department’s skills and fire ground evolutions “In-House” test will be allowed to participate in the state certification exam. Department training records must show all candidates have successfully passed the “In-House” examination.
CERTIFICATION EXAMINATIONS

After completion of the training process, the Fire Chief/Head of Department can request testing for the department. Using the “Request Examination” form in Appendix B. The Fire Chief/Head of Department may request a written examination and manipulative test for certification. A testing fee may be charged at the time of certification. A separate application must be sent to the NDFA for each attempt. Request forms must reach the NDFA no later than 30 days prior to the examination date. The entire examination process must be completed within 1 year of the first written exam date.

Written Examinations:

The written examinations are randomly generated, 20-30 question per level, tests covering the written objectives of the Technical Rescue standard of NFPA 1006 (2013 ed.) in Chapters 5, 6, 7, 8, & 9. A minimum score of 70% is required to pass the certification exam. Candidates failing the first attempt of the written exam will be permitted to retest no sooner than 30 days from the date of the last exam. Three attempts are given to pass the exam. If a participant fails the written examination three times, he/she has failed the certification process and must wait 1 year from the date of the last failed exam before re-entering the testing process. Exam results are forwarded to the Chief/Administrator within 30 days following the receipt of the completed Exam.
Manipulative Skills “Spot Check” Examination:

This is a two-step examination. A department record check and the manipulative skills "spot check" examination. A certification tester appointed by the NDFA Certification Advisory Committee conducts the examination.

Training records are checked. If records are inadequate, corrective action must be taken before proceeding to the next step. The records must meet minimum requirements and are checked for the following:

- Participant has been trained in each manipulative skill for the level being evaluated.
- A department training officer has signed off each manipulative skill.
- Each trainee has passed a department "in-house" manipulative skills examination.

The manipulative skill "spot check" examination is graded on a 100% pass/fail basis. The test is graded in the following three areas:

**Swiftly** - Each manipulative skill objective must be completed within the allotted time.

**Safely** - Each manipulative skill objective must be completed safely. Conduct that could injure an individual or damage equipment is unacceptable. Equipment should be checked prior to skill testing or training to see that it is safe and functional.

**Competence** - Each manipulative skill objective is performed in accordance with the Utah Standard. This includes performing the proper steps in sequence. Competence will be measured in accordance with the UFSCS manipulative skill objectives.

Participants are "spot checked" on three manipulative skills, or one scenario depending upon the level. The skills will be from NFPA 1006 (2013 ed.) Chapter 5 and the Technical Specialty areas in which the candidate has received training as contained in Chapter 6, 7, 8, or 9. No prior notification of which skill being tested will be given. Participants are given two attempts initially (if necessary) to perform each skill. If they fail on the second attempt, the applicants must wait 30 days before the third and final attempt. Participants taking third attempts will test on the skill they missed plus an additional skill from the section of the standard they failed during the previous two attempts. No training, teaching, or coaching is allowed during the state test.

Participants who have failed the third attempt of the written examination or the manipulative skills examination have failed the certification process and must wait 1 year from the date of the failed third attempt to re-enter state testing. The participant will begin testing with a new 1st attempt of the written examination.

When all requirements for certification have been met, applicants are eligible to be certified. The Chief/Administrator may apply to the North Dakota Firefighter’s Association for certification for those participants who have successfully completed the certification training/testing process. Request for state certification will be submitted to the NDFA using the "Request for Certification" form provided in Appendix C. The names are then checked against the official state records to ensure that everyone listed has met all requirements and prerequisites.
Operational Levels.

The AHJ shall establish written standard operating procedures (SOPs) consistent with one of the following operational levels for each of the disciplines defined in this document:

a. **Level I.** This level shall apply to individuals who identify hazards, use equipment, and apply limited techniques specified in this standard to perform technical rescue operations.

b. **Level II.** This level shall apply to individuals who identify hazards, use equipment, and apply advanced techniques specified in this standard to perform technical rescue operations.

JOB PERFORMANCE REQUIREMENTS
Technical Rescuer Skills Assessment
Skill Sheet #1

IDENTIFY NEEDED SUPPORT RESOURCES

JPR: NFPA 1006-2013 edition, Section 5.2.1

Candidate Equipment Required: Proper PPE, applicable reference material, and portable radio

Evaluator Equipment Required: Proper PPE

Read to Candidate:
For this skill event, you will identify the needed support resources, given a specific type of rescue incident, so that a resource cache is managed, scene lighting is provided for the tasks to be undertaken, environmental concerns are managed, personnel rehabilitation is facilitated, and the support operation facilitates rescue operational objectives.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

Skill Sheet #2

SIZE UP A RESCUE INCIDENT

JPR: NFPA 1006-2013 edition, Section 5.2.2

Candidate Equipment Required: Proper PPE, applicable reference material, and portable radio
Evaluator Equipment Required: Proper PPE

Read to Candidate:
For this skill event, you will size up a rescue incident, given background information and applicable reference materials, so that the type of rescue is determined, the number of victims is identified, the last reported location of all victims is established, witnesses and reporting parties are identified and interviewed, resource needs are assessed, search parameters are identified, and information required to develop an incident action plan is obtained.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt 2nd attempt
___ ___ 1. Type of rescue is determined
___ ___ 2. Number of victims and last reported location of all victims is established
___ ___ 3. Witnesses and reporting parties are identified and interviewed
___ ___ 4. Resource needs are assessed
___ ___ 5. Search parameters are identified
___ ___ 6. Information required to develop an incident action plan is obtained and provided to Incident Command

Candidate’s Name: _____________________________ Station: P ___ F ___ P ___ F ___

Skill Sheet #3

MANAGE INCIDENT HAZARDS

JPR: NFPA 1006-2013 edition, Section 5.2.3

Candidate Equipment Required: Proper PPE, applicable reference material, portable radio, and equipment pertinent to a rescue

Evaluator Equipment Required: Proper PPE

Read to Candidate: For this skill event, you will manage incident hazards, given scene control barriers, personal protective equipment, requisite equipment, and available specialized resources, so that all hazards are identified, resource application fits the operational requirements, hazard isolation is considered, risks to rescuers and victims are minimized, and rescue time constraints are taken into account.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt 2nd attempt
___ ___ 1. All hazards are identified
___ ___ 2. Resource applications fit the operational requirements
___ ___ 3. Hazards were isolated to minimize risk to rescuers and victims
___ ___ 4. Rescue time constraints were taken into account

Candidate’s Name: _____________________________ Station: P ___ F ___ P ___ F ___

1st Attempt 2nd attempt
MANGE RESOURCES IN A RESCUE INCIDENT

JPR: NFPA 1006-2013 edition, Section 5.2.4

Candidate Equipment Required: Proper PPE, applicable reference material, portable radio, and equipment pertinent to a rescue

Evaluator Equipment Required: Proper PPE

Read to Candidate: For this skill event, you will manage resources in a rescue incident, given incident information, a means of communication, resources, tactical worksheets, personnel accountability protocol, applicable references, and standard operating procedures, so that references are utilized, personnel are accounted for, deployed resources achieve desired objectives, incident actions are documented, rescue efforts are coordinated, the command structure is established, task assignments are communicated and monitored, and actions are consistent with applicable regulations.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1. References are utilized
2. Incident management system used
3. Completes tactical worksheets
4. Evaluates incident information
5. Uses correct resources for operational needs
6. Manages and operates communication equipment
7. Communicates effectively so that objectives are met

INITIATE A DISCIPLINE SPECIFIC SEARCH

JPR: NFPA 1006-2013 edition, Section 5.2.5

Candidate Equipment Required: Proper PPE, applicable reference material, portable radio, and equipment pertinent to a search
Evaluator Equipment Required: Proper PPE

Read to Candidate: For this skill event, you will initiate a discipline-specific search, given hazard-specific PPE, equipment pertinent to search mission, an incident location, and victim investigative information, so that search parameters are established; the victim profile is established; the entry and exit of all people either involved in the search or already within the search area are questioned and the information is updated and relayed to command; the personnel assignments match their expertise; all victims are located as quickly as possible; applicable technical rescue concerns are managed; risks to searchers are minimized; and all searchers are accounted for.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt 2nd attempt
____ ____ 1. Search parameters are established
____ ____ 2. Victim profile is established
____ ____ 3. The entry and exit of all people either involved in the search or already within the search area are questioned and the information is relayed to command
____ ____ 4. Personnel assignments match their expertise
____ ____ 5. All victims are located as quickly as possible
____ ____ 6. Applicable technical rescue concerns are managed
____ ____ 7. Risks to searchers are minimized
____ ____ 8. All searchers are accounted for

PERFORM GROUND SUPPORT ACTIVITIES FOR HELICOPTER OPERATIONS

JPR: NFPA 1006-2013 edition, Section 5.2.6

Candidate Equipment Required: Proper PPE, portable radio, and requisite equipment
Evaluator Equipment Required: Proper PPE

Read to Candidate:
For this skill event, you will perform ground support operations for helicopter activities, given a rescue scenario/incident, helicopter, operational plans, PPE, requisite equipment, and available specialized resources, so that rescue personnel are aware of the operational characteristics of the aircraft and demonstrate operational proficiency in establishing and securing landing zones and communicating with aircraft personnel until the assignment is complete.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt 2nd attempt
____  ____ 1. Rescue personnel are aware of the operational characteristics of the aircraft
____  ____ 2. Rescue personnel demonstrate operational proficiency in establishing and securing landing zones
____  ____ 3. Rescue personnel communicate with the aircraft personnel until assignment is complete

Technical Rescuer Skills Assessment
Skill Sheet #8

TRIAGE VICTIMS

JPR: NFPA 1006-2013 edition, Section 5.3.1

Candidate Equipment Required: Proper PPE, portable radio, and triage tags
Evaluator Equipment Required: Proper PPE

Read to Candidate:
For this skill event, you will triage victims, given triage tags and local protocol, so that rescue versus recovery factors are assessed, triage decisions reflect resource capabilities, severity of injuries is determined, and victim care and rescue priorities are established in accordance with local protocol. This is not a timed event.

To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt 2nd attempt
____ ____ 1. Dons appropriate PPE
____ ____ 2. Assesses victims per local triage protocol
____ ____ 3. Determines if victims can be rescued or if this is a recovery
____ ____ 4. Applies triage tag with correct category to the victim, based on local protocol

Skill Sheet #9

MOVE A VICTIM IN A LOW-ANGLE ENVIRONMENT

JPR: NFPA 1006-2013 edition, Section 5.3.2

Candidate Equipment Required: Proper PPE, rope rescue system, a specified minimum travel distance for the litter tender, life safety harnesses, litters, bridles, and specialized equipment necessary for the environment

Evaluator Equipment Required: Proper PPE

Read to Candidate:
For this skill event, you will move a victim in a low-angle environment, given victim transport equipment, litters, other specialized equipment, and victim removal systems specific to the rescue environment, so that the victim is moved without undue further injuries, risks to rescuers are minimized, the integrity of the victim’s securement within the transfer device is established and maintained, the means of attachment to the rope rescue system is maintained, and the victim is removed from the hazard.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt 2nd attempt

___ ___ 1. Select and secured victim to transport equipment
___ ___ 2. Assemble and operate environment-specific victim removal systems
___ ___ 3. Maneuver across the terrain
___ ___ 4. Manage the litter while suspended from the rope rescue system
___ ___ 5. Evaluate surroundings for potential hazards

Skill Sheet #10

INSPECT AND MAINTAIN HAZARD-SPECIFIC PPE

JPR: NFPA 1006-2013 edition, Section 5.4.1

Candidate Equipment Required: Proper PPE, technical rescue references, and requisite equipment
Evaluator Equipment Required: Proper PPE

Read to Candidate:
For this skill event, you will inspect and maintain hazard specific PPE, given clothing or equipment for the protection of the rescuers, cleaning and sanitation supplies, maintenance logs or records, and such tools and resources as are indicated by the manufacturer’s guidelines for assembly or disassembly of components during repair or maintenance, so that damage, defects, and wear are identified and reported or repaired, equipment has been performed and documented consistent with the manufacturer’s recommendations.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt  2nd attempt

1. Identifies wear and damage indicators for PPE
2. Evaluates the operational readiness of PPE
3. Completes logs and records
4. Uses reference materials and cleaning equipment specific to the task

INSPECT AND MAINTAIN RESCUE EQUIPMENT

JPR: NFPA 1006-2013 edition, Section 5.4.2

Candidate Equipment Required: Proper PPE, technical rescue references, and requisite equipment

Evaluator Equipment Required: Proper PPE

Read to Candidate:
For this skill event, you will inspect and maintain rescue equipment, given maintenance logs and records, tools, and resources as indicated by the manufacturer’s guidelines, equipment replacement protocol, and organizational standard operating procedure, so that the operational status of equipment is verified and documented, all components are checked for operation, deficiencies are repaired or reported as indicated by standard operating procedure, and items subject to replacement protocol are correctly disposed of and changed.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt  2nd attempt
___  ___  1. Identifies wear and damage indicators for rescue equipment
___  ___  2. Evaluates operational readiness of equipment
___  ___  3. Completes logs and records
___  ___  4. Selects and uses correct maintenance tools per manufacturer guidelines

Candidate’s Name: ____________________________ Station: P ___ F ___  P ___ F ___

Evaluator’s Signature: __________________________

1st Attempt  2nd attempt
Technical Rescuer Skills Assessment
Skill Sheet #12

DEMONSTRATE KNOTS, BENDS, AND HITCHES

JPR: NFPA 1006-2013 edition, Section 5.5.1

Candidate Equipment Required: Proper PPE, 8mm “prusik” rope, ½” rescue rope, rescue webbing
Evaluator Equipment Required: Proper PPE

Read to Candidate:
For this skill event, you will demonstrate knots, bends, and hitches, given ropes, webbing, and a list of knots used by the agency, so that the knots are dressed, recognizable, and backed up as required.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt  2nd attempt

1. Correctly ties end-of-line loop (figure eight on a bight)
2. Correctly ties midline loop (butterfly knot)
3. Correctly secures rope around desired object (figure eight follow through)
4. Correctly joins rope or webbing ends together (water knot)
5. Correctly ties “gripping rope” (clove hitch)

Candidate’s Name: __________________________________ Station: P ___ F ___ P ___ F ___

Evaluator’s Signature: ________________________________

1st Attempt  2nd attempt
CONSTRUCT A SINGLE POINT ANCHOR SYSTEM

JPR: NFPA 1006-2017 edition, Section 5.5.2

Candidate Equipment Required: Proper PPE, suitable anchor, requisite equipment
Evaluator Equipment Required: Proper PPE

Read to Candidate:
For this skill event, you will construct a single-point anchor system, given life safety rope and other auxiliary rope rescue equipment, so that the chosen anchor system fits the incident needs, meets or exceeds the expected load, and does not interfere with rescue operations, an efficient anchor point is chosen, the need for redundant anchor points is assessed and used as required, the anchor system is inspected and loaded prior to being placed into service, and the integrity of the system is maintained throughout the operation.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt  2nd attempt
___  ___  1. Evaluates anchor for required strength, location, and surface contour
___  ___  2. Selects appropriate rope and equipment
___  ___  3. Ties appropriate knots correctly
___  ___  4. Rigs the system correctly
___  ___  5. Performs system safety check

Candidate’s Name: _____________________________ Station: P ___ F ___  P ___ F ___

Evaluator’s Signature: __________________________

1st Attempt  2nd attempt
Technical Rescuer Skills Assessment
Skill Sheet #14

PLACE EDGE PROTECTION

JPR: NFPA 1006-2013 edition, Section 5.5.3

Candidate Equipment Required: Proper PPE, requisite equipment, and a sharp or abrasive edge

Evaluator Equipment Required: Proper PPE

Read to Candidate:
For this skill event, place edge protection, given life safety rope or webbing traversing a sharp or abrasive edge, edge protection, and other auxiliary rope rescue equipment, so that the rope or webbing is protected from abrasion or cutting, the rescuer is safe from falling while placing the edge protection, the edge protection is secure, and the rope or webbing is securely placed on the edge protection.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt 2nd attempt

1. Selects appropriate protective devices for protecting rope and webbing
2. Uses personal fall protection while working near edges
3. Secures edge protection
4. Secures ropes or webbing in a specific location

Candidate’s Name: _____________________________ Station: P ___ F ___ P ___ F ___ 
1st Attempt 2nd attempt

CONSTRUCT A SIMPLE ROPE MECHANICAL ADVANTAGE SYSTEM

JPR: NFPA 1006-2013 edition, Section 5.5.4

Candidate Equipment Required: Proper PPE, life safety rope, carabiners, pulleys, rope grab devices, and auxiliary rope rescue equipment

Evaluator Equipment Required: Proper PPE

Read to Candidate:
For this skill event, construct a simple rope mechanical advantage system, given life safety rope, carabiners, pulleys, rope grab devices, and auxiliary rope rescue equipment, so that the system constructed can accommodate the load, is efficient, and is connected to an anchor system and the load.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt 2nd attempt
____ ____ 1. Tie appropriate knots
____ ____ 2. Choose and rig systems
____ ____ 3. Attach mechanical advantage system to the anchor system and load
____ ____ 4. Perform a system safety check

Candidate’s Name: ___________________________ Station: P __ F __ P __ F __

DIRECT A TEAM IN THE OPERATION OF A SIMPLE ROPE MECHANICAL ADVANTAGE SYSTEM IN A LOW-ANGLE RAISING OPERATION

JPR: NFPA 1006-2013 edition, Section 5.5.5

Candidate Equipment Required: Proper PPE, life safety rope, carabiners, pulleys, rope grab devices, and auxiliary rope rescue equipment

Evaluator Equipment Required: Proper PPE

Read to Candidate:
For this skill event, direct a team in the operation of a simple rope mechanical advantage system in a low-angle raising operation, given rescue personnel, a specified minimum travel distance for the load, an established rope rescue system incorporating a simple rope mechanical advantage system, a load to be moved, and an anchor system, so that the movement is controlled; a reset is accomplished; the load can be held in place when needed; operating methods do not stress the system to the point of failure; commands are used to direct the operation; and potential problems are identified, communicated, and managed.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt  2nd attempt

____  ____  1. Load movement is controlled
____  ____  2. Reset is accomplished properly
____  ____  3. Load held in place as directed by IC
____  ____  4. System not overly stressed
____  ____  3. Proper commands used to direct operations
____  ____  4. Problems identified, communicated, and managed

FUNCTION AS A LITTER TENDER IN A LOW-ANGLE LOWERING OR RAISING OPERATION

JPR: NFPA 1006-2017 edition, Section 5.5.6

Candidate Equipment Required: Proper PPE, rope rescue system, specified minimum travel distance for the litter tender, life safety harness, litters, bridles, and specialized equipment necessary for the environment

Evaluator Equipment Required: Proper PPE

Read to Candidate:
For this skill event, perform the activities of a litter tender in a low-angle lowering or raising operation, given a rope rescue system, a specified minimum travel distance for the litter tender, life safety harnesses, litters, bridles, and specialized equipment necessary for the environment, so that risks to victims and rescuers are minimized; the means of attachment to the rope rescue system is secure; and the travel path is negotiated while minimizing risks to equipment or persons.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt 2nd attempt

1. Uses proper PPE
2. Attaches life safety harness to the rope rescue system
3. Maneuver the litter past obstacles
4. Manage the litter while attached to the rope rescue system
5. Evaluate surroundings for potential hazards

Skill Sheet #18

CONSTRUCT A LOWERING SYSTEM

JPR: NFPA 1006-2013 edition, Section 5.5.7

Candidate Equipment Required: Proper PPE, an anchor system, life safety rope, descent control device, auxiliary rope rescue equipment

Evaluator Equipment Required: Proper PPE

Read to Candidate:
For this skill event, construct a lowering system, given an anchor system, life safety rope(s), descent control device, and auxiliary rope rescue equipment, so that the system can accommodate the load, is efficient, is capable of controlling the descent, is capable of holding the load in place or lowering with minimal effort over the required distance, and is connected to an anchor system and the load.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt 2nd attempt
1. Dons appropriate PPE
2. Tie appropriate knots
3. Perform rigging
4. Attach descent control device
5. Anchor system and load
6. Perform system safety check

Skill Sheet #20

CONSTRUCT A BELAY SYSTEM

JPR: NFPA 1006-2013 edition, Section 5.5.9

Candidate Equipment Required: Proper PPE, life safety rope, anchor system, rope rescue equipment
Evaluator Equipment Required: Proper PPE

Read to Candidate:
For this skill event, construct a belay system, given life safety rope, anchor systems, PPE, and rope rescue equipment, so that the system is capable of arresting a fall, a fall will not result in system failure, the system is not loaded unless actuated, actuation of the system will not injure or otherwise incapacitate the belayer, the belayer is not rigged into the equipment components of the system, and the system is suitable to the site and is connected to an anchor system and the load.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt  2nd attempt

1. Select a belay system
2. Wear appropriate task specific PPE
3. Tie rescue knots with safety knots as required
4. Perform rigging
5. Attach to anchor system and load
6. Perform system safety check

Candidate’s Name: _____________________________ Station: P ______ F ______  P ______ F ______

OPERATE A BELAY SYSTEM DURING A LOWERING OR RAISING OPERATION

JPR: NFPA 1006-2013 edition, Section 5.5.10

Candidate Equipment Required: Proper PPE, operating lowering or raising mechanical advantage system, specified minimum travel distance for the load, a belay system and a load

Evaluator Equipment Required: Proper PPE

Read to Candidate:
For this skill event, operate a belay system during a lowering or raising operation, given an operating lowering or raising mechanical advantage system, a specified minimum travel distance for the load, a belay system, and a load, so that the potential fall factor is minimized, the belay device system is not actuated during operation of the primary rope rescue system, the belay system is prepared for actuation at all times during the operation, the belayer is attentive at all times during the operation, the load’s position is continually monitored, and the belayer moves the rope through the belay device as designed.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt 2nd attempt
____ ____ 1. Don task specific PPE
____ ____ 2. Tie approved knots
____ ____ 3. Properly attach a belay line to a belay device
____ ____ 4. Perform a system safety check
____ ____ 5. Manage and communicate belay system status effectively

DIRECT A LOWERING OPERATION IN A HIGH-ANGLE ENVIRONMENT

JPR: NFPA 1006-2013 edition, Section 6.1.2

Candidate Equipment Required: Proper PPE, rescue personnel, established lowering system, specified minimum travel distance for the load and a load.

Evaluator Equipment Required: Proper PPE

Read to Candidate:
For this skill event, direct a lowering operation in a high-angle environment, given rescue personnel, an established lowering system, a specified minimum travel distance for the load, and a load to be moved, so that the movement is controlled, the load can be held in place when needed, operating methods do not stress the system to the point of failure, rope commands are used to direct the operation, and potential problems are identified, communicated, and managed.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt 2nd attempt
____ ____ 1. Direct personnel using operational commands
____ ____ 2. Analyzes system efficiency
____ ____ 3. Manage movement of the load in a high-angle environment
____ ____ 4. Identify safety concerns
____ ____ 5. Perform a system safety check

1st Attempt 2nd attempt

Evaluator’s Signature: ___________________________
CONSTRUCT A MULTIPLE-POINT ANCHOR SYSTEM

JPR: NFPA 1006-2017 edition, Section 6.1.3

Candidate Equipment Required: Proper PPE, suitable anchor, requisite equipment

Evaluator Equipment Required: Proper PPE

Read to Candidate:
For this skill event, you will construct a multiple-point anchor system, given life safety rope and other auxiliary rope rescue equipment, so that the chosen anchor system fits the incident needs, the system strength meets or exceeds the expected load and does not interfere with rescue operations, equipment is visually inspected prior to being put in service, the nearest anchor point that will support the load is chosen, the anchor system is system safety checked prior to being placed into service, the integrity of the system is maintained throughout the operation, and weight will be distributed between more than one anchor point.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1. The chosen anchor system fits the incident needs
2. The system meets or exceeds the expected load
3. Selects effective knots
4. Evaluate incident operations as related to interference concerns and setup
5. Perform a system safety check
6. Evaluate system components for comprised integrity

Candidate’s Name: _____________________________ Station: P F P F

Evaluator’s Signature: ___________________________
Rope Rescue Level I Skills Assessment
Skill Sheet #4

CONSTRUCT A COMPOUND ROPE MECHANICAL ADVANTAGE SYSTEM

JPR:  NFPA 1006-2013 edition, Section 6.1.4

Candidate Equipment Required: Proper PPE, a load, an anchor system, life safety rope, carabiners, pulleys, rope grab devices, and rope rescue equipment

Evaluator Equipment Required: Proper PPE

Read to Candidate:
For this skill event, construct a compound rope mechanical advantage system, given a load, an anchor system, life safety rope, carabiners, pulleys, rope grab devices, and rope rescue equipment, so that the system constructed accommodates the load and reduces the force required to lift the load, operational interference is factored and minimized, the system is efficient, a system safety check is completed, and the system is connected to an anchor system and the load.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1. Determines incident needs as related to choosing compound rope systems
2. Select effective knots
3. Calculate expected loads
4. Evaluate incident operations as related to interference concerns and setups
5. Perform system safety check
6. Evaluate system components for compromised integrity

Candidate’s Name: ___________________________  Station: P ___ F ___  P ___ F ___

DIRECT THE OPERATION OF A COMPOUND ROPE MECHANICAL ADVANTAGE SYSTEM IN A HIGH-ANGLE ENVIRONMENT

JPR: NFPA 1006-2013 edition, Section 6.1.6

Candidate Equipment Required: Proper PPE, rope rescue system incorporating a compound rope mechanical advantage system, a load to be moved, a specific minimum travel distance

Evaluator Equipment Required: Proper PPE

Read to Candidate:
For this skill event, direct the operation of a compound rope mechanical advantage system in a high-angle environment, given a rope rescue system incorporating a compound rope mechanical advantage system and a load to be moved, and a specified minimum travel distance for the load, so that a system safety check is performed; a reset is accomplished, and the movement is controlled; the load can be held in place when needed; operating methods do not stress the system to the point of failure; operational commands are clearly communicated; and potential problems are identified, communicated, and managed.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt 2nd attempt

1. Determines incident needs
2. Evaluates incident operations as related to interference concerns
3. Complete system safety check
4. Continually evaluate system components for compromised integrity
5. Direct personnel effectively
6. Communicate commands
7. Analyze system efficiency
8. Manage load movement
9. Identify Concerns

ASCEND A FIXED ROPE IN A HIGH-ANGLE ENVIRONMENT

JPR: NFPA 1006-2013 edition, Section 6.1.7

Candidate Equipment Required: Proper PPE, anchored fixed rope system, specified minimum distance for the rescuer, system to allow ascent of a fixed rope, a structure, a belay system and life safety harness.

Evaluator Equipment Required: Proper PPE

Read to Candidate:
For this skill event, ascend a fixed rope in a high-angle environment, given an anchored fixed rope system, a specified minimum distance for the rescuer, a system to allow ascent of a fixed rope, a structure, a belay system, a life safety harness worn by the person ascending, and PPE, so that the person ascending is secured to the fixed rope in a manner that will not allow him or her to fall; the person ascending is attached to the rope by means of an ascent control device(s) with at least two points of contact; injury to the person ascending is minimized; the person ascending can stop at any point on the fixed rope and rest suspended by his or her harness; the system will not be stressed to the point of failure; the person ascending can convert his or her ascending system to a descending system; obstacles are negotiated; the system is suitable for the site; and the objective is reached.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

Evaluator’s Signature: ______________________________
DESCEND A FIXED ROPE IN A HIGH-ANGLE ENVIRONMENT

JPR:  NFPA 1006-2013 edition, Section 6.1.8

Candidate Equipment Required:  Proper PPE, anchored fixed rope system, specified minimum distance for the rescuer, system to allow descent of a fixed rope, a structure, a belay system and life safety harness.

Evaluator Equipment Required:  Proper PPE

Read to Candidate:
For this skill event, ascend a fixed rope in a high-angle environment, given an anchored fixed rope system, a specified minimum distance for the rescuer, a system to allow descent of a fixed rope, a belay system, a life safety harness worn by the person descending, and PPE, so that the person descending is secured to the fixed rope in a manner that will not allow him or her to fall; the person descending is attached to the rope by means of a descent control device; the speed of descent is controlled; injury to the person descending is minimized; the person descending can stop at any point on the fixed rope and rest suspended by his or her harness; the system will not be stressed to the point of failure; the system is suitable for the site; and the objective is reached.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt  2nd attempt
____  ____  1. Select and use rescuer harness
____  ____  2. Select proper PPE
____  ____  3. Use a system for descending a fixed rope
____  ____  4. Use of a descent control device
____  ____  5. Evaluate surroundings for potential hazards
____  ____  6. Maneuver around existing environmental and system specific obstacles

SECTION – II

CHAPTER 6 – ROPE RESCUE - Level II

JOB PERFORMANCE REQUIREMENTS
Rope Rescue Level II Skills Assessment
Skill Sheet #1

COMPLETE AN ASSIGNMENT WHILE SUSPENDED FROM A ROPE RESCUE SYSTEM IN A HIGH-ANGLE ENVIRONMENT

JPR: NFPA 1006-2013 edition, Section 6.2.1

Candidate Equipment Required: Proper PPE, portable radio, and requisite equipment

Evaluator Equipment Required: Proper PPE

Read to Candidate:
Complete an assignment while suspended from a rope rescue system in a high-angle environment, given a rope rescue system, an assignment, life safety harnesses, litters, bridles, and specialized equipment necessary for the environment, so that risks to victims and rescuers are minimized; the means of attachment to the rope rescue system is secure; selected specialized equipment facilitates efficient rescuer movement; and specialized equipment does not unduly increase risks to rescuers or victims.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt  2nd attempt

1. Selects and uses proper harness and PPE for the environment
2. Attach harness to rope rescue system
3. Maneuver around existing environmental and system specific obstacles
4. Movement of system is controlled
5. Performed work while suspended from rope rescue system
6. Evaluated surroundings for potential hazards

Candidate’s Name: _____________________________ Station: P ___ F ___  P ___ F ___

MOVE A VICTIM IN A HIGH-ANGLE ENVIRONMENT

JPR: NFPA 1006-2013 edition, Section 6.2.2

Candidate Equipment Required: Proper PPE, rope rescue system, a specified minimum travel distance for the litter tender, life safety harnesses, litters, bridles, and specialized equipment necessary for the environment

Evaluator Equipment Required: Proper PPE

Read to Candidate:
For this skill event, you will manage the movement of the victim as the rescuer in a high-angle environment, given a rope rescue system, a specified minimum travel distance for the victim, victim transfer devices, and specialized equipment necessary for the environment, so that risks to victims and rescuers are minimized; undesirable victim movement within the transfer device is minimized; the means of attachment to the rope rescue system is maintained; the victim is removed from the hazard; selected specialized equipment facilitates efficient victim movement; and the victim can be transported to the local EMS provider.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

Skill Sheet #3

FUNCTION AS A LITTER TENDER IN A HIGH-ANGLE LOWERING OR RAISING OPERATION

JPR: NFPA 1006-2013 edition, Section 6.2.3

Candidate Equipment Required: Proper PPE, rope rescue system, specified minimum travel distance for the litter tender, life safety harness, litters, bridles, and specialized equipment necessary for the environment

Evaluator Equipment Required: Proper PPE

Read to Candidate:
For this skill event, perform the activities of a litter tender in a high-angle lowering or raising operation, given a rope rescue system, a specified minimum travel distance for the litter tender, life safety harnesses, litters, bridles, and specialized equipment necessary for the environment, so that risks to victims and rescuers are minimized; the means of attachment to the rope rescue system is secure; and the travel path is negotiated while minimizing risks to equipment or persons.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt  2nd attempt
____  ____ 1. Uses proper PPE
____  ____ 2. Attaches life safety harness to the rope rescue system
____  ____ 3. Maneuver the litter past obstacles
____  ____ 4. Manage the litter while attached to the rope rescue system
____  ____ 5. Evaluate surroundings for potential hazards

Candidate’s Name: _____________________________ Station: P ____ F ____ P ____ F ____

Rope Rescue Level II Skills Assessment  
Skill Sheet #4

DIRECT A TEAM IN TO REMOVE A VICTIM SUSPENDED FROM ROPE OR WEBBING IN A HIGH-ANGLE ENVIRONMENT

JPR: NFPA 1006-2013 edition, Section 6.2.4

Candidate Equipment Required: Proper PPE and system for removal of the victim

Evaluator Equipment Required: Proper PPE

Read to Candidate:
For this skill event, Direct a team in the removal of a victim suspended from rope or webbing in a high-angle environment, given a victim suspended by a harness attached to anchored rope or webbing, devices for removal of the victim from the rope or webbing, and a means of removal of the victim to the ground or other safe area, so that risks to victims and rescuers are minimized, injury to the victim is minimized, the means of attachment to the rope rescue system is maintained, the victim is removed from the rope or webbing, and the victim is brought to a safe area for transfer to EMS.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt   2nd attempt
___ ___  1. Construct system for rapid removal of stranded victim suspended
___ ___  2. Manage operation of the rope rescue system
___ ___  3. Triage victim(s)
___ ___  4. Minimizes hazards for rescuers and victims
___ ___  5. Determine specialized equipment needs for victim removal

Skill Sheet #5

DIRECT A TEAM IN THE CONSTRUCTION OF A ROPE RESCUE SYSTEM INTENDED TO MOVE A SUSPENDED RESCUE LOAD HORIZONTALLY

JPR:  
NFPA 1006-2013 edition, Section 6.2.5

Candidate Equipment Required:  Proper PPE, life safety rope, rope rescue equipment and a suitable anchor
Evaluator Equipment Required:  Proper PPE

Read to Candidate:  
For this skill event, participate as a member of a team in the construction of a rope rescue system intended to move a suspended rescue load along a horizontal path to avoid an obstacle, given rescue personnel, life safety rope, rope rescue equipment, and a suitable anchor capable of supporting the load, so that personnel assignments are made and clearly communicated; the system constructed can accommodate the load; tension applied within the system will not exceed the rated capacity of any of its components’ parts; a system safety check is performed; movement on the load is efficient; and loads can be held in place or moved with minimal effort over the required distance.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt  2nd attempt

____   ____  1. Uses proper PPE
____   ____  2. Determines incident needs as related to construction of a system
____   ____  3. Evaluates incident site as related to interference concerns and setup
____   ____  4. Identifies obstacles to avoid
____   ____  5. Selects a system for the defined task
____   ____  6. Limits excessive force to system components
____   ____  7. Communicates with personnel effectively

Skill Sheet #6

DIRECT A TEAM IN THE OPERATION OF A ROPE RESCUE SYSTEM TO MOVE A SUSPENDED RESCUE LOAD HORIZONTALLY

JPR:      NFPA 1006-2013 edition, Section 6.2.6

Candidate Equipment Required: Proper PPE, life safety rope, rope rescue equipment and a suitable anchor
Evaluator Equipment Required: Proper PPE

Read to Candidate:
Direct a team in the operation of a rope system to move a suspended rescue load along a horizontal path, given rescue personnel, an established system, a target for the load, a load to be moved, and personal protective equipment, so that the movement is controlled; the load is held in place when needed; operating methods do not stress the system to the point of failure; personnel assignments are made; tasks are communicated; and potential problems are identified, communicated and managed.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt  2nd attempt

1. Uses proper PPE
2. Determines incident needs
3. Complete system safety check
4. Evaluate system components for integrity
5. Selects and communicates with personnel effectively
6. Manage movement of the load
7. Evaluate for potential problems

Candidate’s Name: _____________________________ Station: P     F     P     F

Skill Sheet #7

ACCESS A VICTIM IN A HIGH-ANGLE ENVIRONMENT

JPR: NFPA 1006-2013 edition, Section 6.2.7

Candidate Equipment Required: Proper PPE and rope rescue system
Evaluator Equipment Required: Proper PPE

Read to Candidate:
For this skill event, access a victim in a high-angle environment using techniques that require rescuers to climb up or down natural or manmade structures given a belay, a belay system, or other mechanisms, so that the risks from a fall are minimized or eliminated; the patient is accessed; and the objective is achieved.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt  2nd attempt
___ ___  1. Construct system for rapid removal of stranded victim suspended
___ ___  2. Manage operation of the rope rescue system
___ ___  3. Minimizes fall potential and factors for rescuers and victims
___ ___  4. Objective achieved

Candidate’s Name: _____________________________ Station: P ___ F ___ P ___ F ___

Skill Sheet #8

ISOLATE AND MANAGE POTENTIALLY HARMFUL ENERGY SOURCES

JPR: NFPA 1006-2013 edition, Section 6.2.8

Candidate Equipment Required: Proper PPE, hazard securing and disabling devices
Evaluator Equipment Required: Proper PPE

Read to Candidate:
For this skill event, Isolate and manage potentially harmful energy sources found in erected structures, including power systems and construction materials, given personal protective equipment, so that all hazards are identified, systems are managed, beneficial system use is evaluated, and hazards to rescue personnel and victims are minimized.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt 2nd attempt

1. Construct system for rapid removal of stranded victim suspended
2. Manage operation of the rope rescue system
3. Minimizes fall potential and factors for rescuers and victims
4. Objective achieved

CHAPTER 7 – CONFINED SPACE - Level I

JOB PERFORMANCE REQUIREMENTS
Confined Space Level I Skills Assessment
Skill Sheet #1

CONDUCT MONITORING OF THE ENVIRONMENT

JPR: NFPA 1006-2013 edition, Section 7.1.1

Jones and Bartlett Learning, Emergency Medical Responder, 5th Edition

Candidate Equipment Required: Proper PPE, accurately calibrated detection and monitoring equipment, monitoring equipment reference material,

Evaluator Equipment Required: Proper PPE

Read to Candidate:
For this skill event, conduct monitoring of the environment, given monitoring equipment reference material, personal protective equipment, accurately calibrated detection and monitoring equipment, and size-up information, so that a representative sample of the space is obtained, accurate readings are made, readings are documented, and effects of ventilation in determining atmospheric conditions and the conditions of the space have been determined for exposures to existing or potential environmental hazards.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt 2nd attempt

___ ___ 1. Use detection and monitoring equipment
___ ___ 2. Confirm calibration of detection and monitoring equipment
___ ___ 3. Acquire representative samples of space.

Candidate’s Name: _____________________________ Station: P ____ F ____ P ____ F ____

Evaluator’s Signature: ______________________________

Skill Sheet #2

PREPARE FOR ENTRY INTO THE CONFINED SPACE

JPR: NFPA 1006-2013 edition, Section 7.1.2

Jones and Bartlett Learning, Emergency Medical Responder, 5th Edition

Candidate Equipment Required: Proper PPE, confined space prop, confined space rescue tool kit, detection and monitoring equipment.

Evaluator Equipment Required: Proper PPE

Read to Candidate:
For this skill event, you will prepare for entry into the confined space, given a confined space and a confined space rescue tool kit, so that victim communication is established when possible, continuous atmospheric monitoring is initiated, rescuer readiness is verified, rescuers’ limitations are identified and evaluated, rescuers unsuitable to entry operations are reassigned and replaced, route and methods of entry are determined, and rescuer evacuation is planned.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt  2nd attempt

____  ____  1. Operated monitoring equipment correctly.
____  ____  2. Rescuer pre-entry medical exam performed.
____  ____  3. Rescuer capabilities and limitations evaluated.
____  ____  4. Victim communication needs identified.
____  ____  5. Point and route of entry evaluated and determined

Candidate’s Name: _____________________________ Station: P _____ F _____ P _____ F _____

Skill Sheet #3

ENTER INTO THE CONFINED SPACE

JPR: NFPA 1006-2013 edition, Section 7.1.3

Jones and Bartlett Learning, Emergency Medical Responder, 5th Edition

Candidate Equipment Required: Proper PPE, confined space prop, confined space rescue tool kit, detection and monitoring equipment, safety, communication, and operational protocols.

Evaluator Equipment Required: Proper PPE

Read to Candidate:
For this skill event, you will enter a confined space, given personal protective equipment; safety, communication, and operational protocols; and a confined space rescue tool kit, so that the victim is contacted, controlled entry is established and maintained, atmosphere is continuously monitored, the victim’s mental and physical conditions are further assessed, patient care is initiated, the patient is packaged to restrictions of the space, and patient removal can be initiated.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1. Selected and used personal protective equipment correctly.
2. Selected and used rescue-related systems and equipment correctly.
3. Implemented safety, communication, and operational protocols.
4. Used medical protocols to determine treatment priorities.
5. Used medical equipment specific to confined space victim needs.
6. Reassessed and confirmed mode of operation as needed.

Skill Sheet #4

PACKAGE VICTIM FOR REMOVAL FROM A CONFINED SPACE

JPR: NFPA 1006-2013 edition, Section 7.1.4

Jones and Bartlett Learning, Emergency Medical Responder, 5th Edition

Candidate Equipment Required: Proper PPE, confined space prop, confined space rescue tool kit, detection and monitoring equipment, safety, communication, and operational protocols.

Evaluator Equipment Required: Proper PPE

Read to Candidate:
For this skill event, you will package the victim for removal from a confined space, given a confined space rescue tool kit, so that damage to the rescue/retrieval equipment is prevented, the victim is given the smallest possible profile, and further harm to the victim is minimized.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt 2nd attempt

1. Established and maintained C-Spine immobilization.  
2. Packaged victims in harnesses, low-profile devices, and/or litters.
3. Recognized and performed basic management of various traumatic injuries and medical conditions.
4. Supported respiratory efforts.
5. Performed cardiopulmonary resuscitation as required.

Skill Sheet #5

REMOVE ALL ENTRANTS FROM A CONFINED SPACE

JPR: NFPA 1006-2013 edition, Section 7.1.5

Jones and Bartlett Learning, Emergency Medical Responder, 5th Edition

Candidate Equipment Required: Proper PPE, confined space prop, confined space rescue tool kit, detection and monitoring equipment, safety, communication, and operational protocols.

Evaluator Equipment Required: Proper PPE

Read to Candidate:
For this skill event, you will remove all entrants from a confined space, given personal protective equipment, rope and related rescue and retrieval systems, personnel to operate rescue and retrieval systems, and a confined space rescue tool kit, so that internal obstacles and hazards are negotiated, all persons are extricated from a space in the selected transfer device, the victim and rescuers are decontaminated as necessary, and the victim is delivered to the EMS provider.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt 2nd attempt

1. Selected and used proper personal protective equipment,

2. Selected and operated rescue and retrieval systems for victim removal.

3. Correctly utilized medical equipment as needed.

4. Following local protocols, used decontamination equipment correctly as needed.

5. Patient transferred to EMS provider following applicable local protocols.

Candidate’s Name: _____________________________ Station: P ___ F ___ P ___ F ___

CHAPTER 7 – CONFINED SPACE - Level II

JOB PERFORMANCE REQUIREMENTS
Confined Space Level II Skills Assessment
Skill Sheet #1

PREPLAN A CONFINED SPACE INCIDENT

JPR: NFPA 1006-2013 edition, Section 7.2.1

Jones and Bartlett Learning, Emergency Medical Responder, 5th Edition

Candidate Equipment Required: Safety, communication, and operational protocols, preplan forms

Evaluator Equipment Required: Proper PPE

Read to Candidate:
For this skill event, you will preplan a confined space incident, given applicable guidelines and regulations and a preplan form, so that a standard approach is used during a confined space rescue emergency, hazards are recognized and documented, isolation methods are identified and documented, all accesses to the location of the entry opening are identified and documented, all types of entry openings are identified and documented, and internal configurations and special resource needs are documented for future rescuer use.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt 2nd attempt

1. Selected and completed appropriate preplan forms.

2. Form included sketch of confined spaces.

3. Identified and evaluated various configurations of confined spaces, access points, entry openings, isolation procedures, and energy control locations.

4. Recognized general and site-specific hazards.

5. All data documented.

6. Applied all regulatory compliance references.

Skill Sheet #2

ASSESS THE INCIDENT

JPR: NFPA 1006-2013 edition, Section 7.2.2

Jones and Bartlett Learning, Emergency Medical Responder, 5th Edition

Candidate Equipment Required: preplan of the space or size-up information; information from technical resources, and monitoring equipment, and personal protective equipment.

Evaluator Equipment Required: Proper PPE

Read to Candidate:
For this skill event, you will assess the incident, given a preplan of the space or size-up information, information from technical resources, monitoring equipment, and personal protective equipment required to perform the assessment, so that general area and space-specific hazards are identified, bystanders and victims are interviewed, immediate and ongoing monitoring of the space is performed, the victims’ conditions and location are determined, a risk–benefit analysis is performed, methods of ingress and egress for rescuer and victims are identified, rescue systems for victim removal are determined, and an emergency means of retrieval for rescue entrants is established.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1. Selected and interpreted preplan and size-up information.
2. Conducted interviews as applicable.
3. Selected and utilized appropriate personal protective equipment.
4. Operated monitoring equipment as needed.
5. Identified hazard mitigation options.
6. Identified probable victim location.
8. Recognized characteristics and hazards of confined spaces.
9. Evaluated specific rescue systems for entry and retrieval of rescuers and victims during confined space incidents.

Candidate’s Name: _____________________________ Station: P _____ F _____

SECTION – IV

CHAPTER 8 – TRENCH RESCUE - Level I

JOB PERFORMANCE REQUIREMENTS
Trench Rescue Level I Skills Assessment
Skill Sheet #1

CONDUCT A SIZE-UP OF A COLLAPSED TRENCH

JPR: NFPA 1006-2013 edition, Section 8.1.1

Reference: Jones and Bartlett, Trench Rescue: Principles and Practice to NFPA 1006 and 1670, 3rd Edition

Candidate Equipment Required: Appropriate PPE

Evaluator Equipment Required: Appropriate PPE

Read to Candidate:
For this skill event, you will conduct a size-up of a collapsed trench, given an incident and background information and applicable reference material, so that the size-up is conducted within the scope of the incident management system; the existing and potential conditions are evaluated within the trench and the rescue area; general hazards are identified; a witness or “competent person” is secured; the probability of victim existence, number, condition, and location is determined; potential for rapid, nonentry rescues or victim self-rescue is recognized; needed personnel, supply, and equipment resources are evaluated; and utility involvement and location are determined.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1. Dimensions of the trench are determined.
2. Determined category of soil.
3. Identified type and degree of collapse.
4. Identified severe environmental conditions with implications for secondary collapse and victim survivability.
5. Interviewed witnesses (“competent persons”).
6. Implemented protocols and resource acquisition agreements.
7. Notified public works for utility location.
8. Performed a risk–benefit analysis to identify response mode.
9. Implemented incident command system.
10. Applied appropriate regulations, policies, and standards.

Candidate’s Name: _____________________________ Station: P F P F

Trench Rescue Level I Skills Assessment  
Skill Sheet #2

IMPLEMENT A TRENCH EMERGENCY ACTION PLAN

JPR: NFPA 1006-2013 edition, Section 8.1.2

Reference: -Jones and Bartlett, Trench Rescue: Principles and Practice to NFPA 1006 and 1670, 3rd Edition

Candidate Equipment Required: Appropriate PPE

Evaluator Equipment Required: Appropriate PPE

Read to Candidate:
For this skill event, you will implement a trench emergency action plan, given size-up information and a trench incident, so that initial size-up information is utilized; pre-briefing is given to rescuers; documentation is ongoing; the collapse zone is established; a risk–benefit analysis is conducted; rapid, nonentry rescues or victim self-rescues are performed; the rescue area and general area are made safe; strategy and tactics are confirmed and initiated for existing and potential conditions; rapid intervention team and operational tasks are assigned; other hazards are mitigated; rescue resources are staged; and a protective system is being utilized. You MUST verbally describe those skills which cannot be accomplished hands on.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt 2nd attempt

1. Used and documented tactical worksheets.
2. Disseminated information to rescue team.
3. Successfully described mechanics and extent of collapse effects.
5. Performed rapid, nonentry rescues as needed.
6. Mitigated hazards by isolation, removal, or control.
7. Chose strategy and tactics that enhanced successful outcome.
8. Implemented incident management system and resource staging.
9. Applied isolation and/or protective system promptly to surround victim.

Candidate’s Name: _____________________________ Station: P ____ F ____ P ____ F ____

Evaluator’s Signature: __________________________
IMPLEMENT SUPPORT OPERATIONS AT TRENCH EMERGENCIES

JPR: NFPA 1006-2013 edition, Section 8.1.3

Reference: Jones and Bartlett, Trench Rescue: Principles and Practice to NFPA 1006 and 1670, 3rd Edition

Candidate Equipment Required: Appropriate PPE

Evaluator Equipment Required: Appropriate PPE

Read to Candidate:
For this skill event, you will be given an assignment, and equipment and other resources, so that a resource cache is managed, scene lighting is provided for the tasks to be undertaken, environmental concerns are managed, a cut station is established, supplemental power is provided for all equipment, atmospheric monitoring and ventilation are implemented, personnel rehab is facilitated, operations proceed without interruption, extrication methods are in place, and the support operations facilitate rescue operational objectives. You MUST verbally describe those skills which cannot be accomplished hands on.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1. Managed equipment inventory.
2. Established power supply.
3. Acquired and established appropriate lighting.
4. Choose and deployed dewatering techniques.
5. Acquired or constructed shelter and thermal protection.
6. Selected rehab areas and set-up personnel rotations.
7. Operated atmospheric monitoring and ventilation equipment.

Candidate’s Name: _____________________________ Station: P ____ F ____ P ____ F ____

Evaluator’s Signature: ______________________________

Skill Sheet #4

SUPPORT A NONINTERSECTING STRAIGHT WALL TRENCH

JPR: NFPA 1006-2013 edition, Section 8.1.4

Reference: - Jones and Bartlett, Trench Rescue: Principles and Practice to NFPA 1006 and 1670, 3rd Edition

Candidate Equipment Required: Appropriate PPE

Evaluator Equipment Required: Appropriate PPE

Read to Candidate:
For this skill event, you will support a nonintersecting straight wall trench of 2.4 m (8 ft) or less as a member of a team, given size-up information, an action plan, a trench tool kit, and an assignment, so that strategies to minimize the further movement of soil are implemented effectively; trench walls, lip, and spoil pile are monitored continuously; rescue entry team(s) remains in a safe zone; any slough-in and wall shears are mitigated; emergency procedures and warning systems are established and understood by participating personnel; incident-specific personal protective equipment is utilized; physical hazards are identified and managed; victim and rescuer protection is maximized; victim extraction methods are considered; and a rapid intervention team is staged. You MUST verbally describe those skills which cannot be accomplished hands on.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt 2nd attempt

1. Interpreted tabulated data information and tables.
2. Placed shoring and shielding systems appropriately
3. Installed supplemental shoring appropriately.
4. Established emergency protocols and warning systems.
5. Chose appropriate methods to stabilize trench.
6. Properly used personal protective equipment.
7. Anticipated extrication logistics (verbalized).
8. Safe zone identified.

Skill Sheet #5

RELEASE A VICTIM FROM SOIL ENTRAPMENT

JPR: NFPA 1006-2013 edition, Section 8.1.5

Reference: - Jones and Bartlett, Trench Rescue: Principles and Practice to NFPA 1006 and 1670, 3rd Edition

Candidate Equipment Required: Appropriate PPE

Evaluator Equipment Required: Appropriate PPE

Read to Candidate:
For this skill event, you will release a victim from soil entrapment by components of a nonintersecting collapsed trench of 2.4 m (8 ft) or less in depth, given personal protective equipment, a trench rescue tool kit, and specialized equipment, so that hazards to rescue personnel and victims are minimized, considerations are given to crush syndrome and other injuries, techniques are used to enhance patient survivability, tasks are accomplished within projected time frames, and techniques do not compromise the integrity of the existing trench shoring system. You MUST verbally describe those skills which cannot be accomplished hands on.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt   2nd attempt
___ ___ 1. Selected, used, and cared for personal protective equipment.
___ ___ 2. Operated rescue tools and stabilization systems.
___ ___ 3. Identified crush syndrome clinical settings.

Candidate’s Name: _____________________________ Station: P ___ F ___  P ___ F ___

Skill Sheet #6

REMOVE A VICTIM FROM A TRENCH

JPR: NFPA 1006-2013 edition, Section 8.1.6

Reference: -Jones and Bartlett, Trench Rescue: Principles and Practice to NFPA 1006 and 1670, 3rd Edition

Candidate Equipment Required: Appropriate PPE

Evaluator Equipment Required: Appropriate PPE

Read to Candidate:
For this skill event, you will remove a victim from a trench, given a disentangled victim, a basic first aid kit, and victim packaging resources, so that basic life functions are supported as required, the victim is evaluated for signs of crush syndrome, methods and packaging devices selected are compatible with intended routes of transfer, universal precautions are employed to protect personnel from bloodborne pathogens, and extraction times meet time constraints for medical management. You MUST verbally describe those skills which cannot be accomplished hands on.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1. Selected, used, and cared for personal protective equipment.

2. Provided basic medical care and immobilization techniques.

3. Identified the need for advanced life support and crush syndrome management.

4. Used a removal system that matches logistical and medical management time frame concerns.

DISASSEMBLE SUPPORT SYSTEMS AT A TRENCH EMERGENCY INCIDENT

JPR: NFPA 1006-2013 edition, Section 8.1.7

Reference: -Jones and Bartlett, Trench Rescue: Principles and Practice to NFPA 1006 and 1670, 3rd Edition

Candidate Equipment Required: Appropriate PPE

Evaluator Equipment Required: Appropriate PPE

Read to Candidate:
For this skill event, you will disassemble support systems at a trench emergency incident, given personal protective equipment, trench tool kit, and removal of victim(s), so that soil movement is minimized, all rescue equipment is removed from the trench, sheeting and shoring are removed in the reverse order of their placement, emergency protocols and safe zones in the trench are adhered to, rescue personnel are removed from the trench, the last supporting shores are pulled free with ropes, equipment is cleaned and serviced, reports are completed, and a post briefing is performed. You MUST verbally describe those skills which cannot be accomplished hands on.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt 2nd attempt

1. Selected, used, and cared for personal protective equipment.
2. Removed equipment and protective systems.
3. Used trench safety protocols.
4. Cleaned and serviced equipment as needed.
5. Performed an incident debriefing.

CHAPTER 8 – TRENCH RESCUE - Level II

JOB PERFORMANCE REQUIREMENTS
Trench Rescue Level II Skills Assessment

Skill Sheet #1

SUPPORT AN INTERSECTING TRENCH

JPR: NFPA 1006-2013 edition, Section 8.2.1

Reference: -Jones and Bartlett, Trench Rescue: Principles and Practice to NFPA 1006 and 1670, 3rd Edition

Candidate Equipment Required: Appropriate PPE

Evaluator Equipment Required: Appropriate PPE

Read to Candidate:
For this skill event, you will support an intersecting trench as a member of a team, given size-up information and an action plan, a trench tool kit, and an assignment, so that strategies to minimize the further movement of soil are implemented effectively; trench walls, lip, and spoil pile are monitored continuously; rescue entry team(s) in the trench remains in a safe zone; any slough-in and wall shears are mitigated; emergency procedures and warning systems are established and understood by participating personnel; incident-specific personal protective equipment is utilized; physical hazards are identified and managed; victim protection is maximized; victim extrication methods are considered; and a rapid intervention team is staged. You MUST verbally describe those skills which cannot be accomplished hands on.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt 2nd attempt

1. Interpreted tabulated data information and tables.
2. Placed shoring and shielding systems appropriately
3. Identified type of intersecting trench.
4. Established emergency protocols and warning systems.
5. Chose appropriate methods to stabilize trench.
6. Properly used personal protective equipment.
7. Anticipated extrication logistics (verbalized).
8. Safe zone identified.

INSTALL SUPPLEMENTAL SHEETING AND SHORING

**JPR:**
NFPA 1006-2013 edition, Section 8.2.2

**Reference:**
-Jones and Bartlett, Trench Rescue: Principles and Practice to NFPA 1006 and 1670, 3rd Edition

**Candidate Equipment Required:** Appropriate PPE

**Evaluator Equipment Required:** Appropriate PPE

**Read to Candidate:**
For this skill event, you will install supplemental sheeting and shoring for each 2 ft (0.61 m) of depth dug below an existing approved shoring system, given size-up information, an action plan, and a trench tool kit, so that the movement of soil is minimized effectively, initial trench support strategies are facilitated, rescue entry team safe zones are maintained, excavation of entrapping soil is continued, victim protection is maximized, victim extrication methods are considered, and a rapid intervention team is staged. You MUST verbally describe those skills which cannot be accomplished hands on.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

**P-Pass / F-Fail**

1st Attempt 2nd attempt

___  ____  1. Interpreted tabulated data information and tables.
___  ____  2. Placed shoring and shielding systems appropriately.
___  ____  3. Identified supplemental sheeting and shoring needs.
___  ____  4. Established emergency protocols and warning systems.
___  ____  5. Chose appropriate methods to stabilize trench.
___  ____  6. Identified exposure to hazards within the trench relative to existing safe zones.
___  ____  7. Properly used personal protective equipment.
___  ____  8. Anticipated extrication logistics (verbalized).

CONSTRUCT LOAD STABILIZATION SYSTEMS

JPR:  NFPA 1006-2013 edition, Section 8.2.3

Reference:  -Jones and Bartlett, Trench Rescue: Principles and Practice to NFPA 1006 and 1670, 3rd Edition

Candidate Equipment Required:  Appropriate PPE

Evaluator Equipment Required:  Appropriate PPE

Read to Candidate:
For this skill event, you will construct load stabilization systems, given an assignment, personal protective equipment, and a trench tool kit, so that the stabilization system will support the load safely, the system is stable, and the assignment is completed. You MUST verbally describe those skills which cannot be accomplished hands on.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt  2nd attempt

1. Selected and constructed stabilization system.
2. Evaluated and determined structural integrity of the system.
3. Calculated the load limit of the system.

Candidate’s Name: _____________________________ Station: P ___ F ___ P ___ F ___

Skill Sheet #4

LIFT A LOAD

JPR: NFPA 1006-2013 edition, Section 8.2.4

Reference: - Jones and Bartlett, Trench Rescue: Principles and Practice to NFPA 1006 and 1670, 3rd Edition

Candidate Equipment Required: Appropriate PPE

Evaluator Equipment Required: Appropriate PPE

Read to Candidate:
For this skill event, you will Lift a load, given a trench tool kit, so that the load is lifted the required distance to gain access; settling or dropping of the load is prevented; control and stabilization are maintained before, during, and after the lift; and operational objectives are attained. You MUST verbally describe those skills which cannot be accomplished hands on.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt 2nd attempt

1. Evaluated and estimated the weight of the load.
2. Correctly operated tools and levers.
3. Applied load stabilization systems.

CHAPTER 9 – STRUCTURAL COLLAPSE - Level I

JOB PERFORMANCE REQUIREMENTS
CONDUCT A SIZE-UP OF A LIGHT FRAME COLLAPSED STRUCTURE

JPR: NFPA 1006-2013 edition, Section 9.1.1

-Jones and Bartlett, Brannigan’s Building Construction for the Fire Service, 4th Edition
-Jones and Bartlett Learning, Emergency Medical Responder, 5th Edition

Candidate Equipment Required: Appropriate PPE
Evaluator Equipment Required: Appropriate PPE

Read to Candidate:
For this skill event, you will conduct a size-up of a light frame collapsed structure, given an incident and specific incident information, so that existing and potential conditions within the structure and the immediate periphery are evaluated, needed resources are defined, hazards are identified, construction and occupancy types are determined, collapse type is identified if possible, the need for rescue is assessed, a scene security perimeter is established, and the size-up is conducted within the scope of the incident management system. You MUST verbally describe those skills which cannot be accomplished hands on.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt 2nd attempt
____  ____  1. Categorized light frame construction type.
____  ____  2. Evaluated structural stability and scene hazards.
____  ____  3. Implemented resource and security (scene management) protocols.

Candidate’s Name: _____________________________ Station: P ____ F ____ P ____ F ____
1st Attempt 2nd attempt
Evaluator’s Signature: __________________________
Determining Potential Victim Locations in Light Frame Construction Collapse Incidents

Determine potential victim locations in light frame construction collapse incidents.

1. Correctly interpreted size-up information.
2. Correctly used occupancy classification information.
3. Correctly used search devices.
4. Assessed and categorized type of collapse.

JPR: NFPA 1006-2013 edition, Section 9.1.2

Reference:
- FEMA National US & R Response System, Structural Collapse Technician
- Jones and Bartlett, Brannigan’s Building Construction for the Fire Service, 4th Edition
- Jones and Bartlett Learning, Emergency Medical Responder, 5th Edition

Candidate Equipment Required: Appropriate PPE
Evaluator Equipment Required: Appropriate PPE

Read to Candidate:
For this skill event, you will determine potential victim locations in light frame construction collapse incidents, given size-up information, a structural collapse tool kit, the type of construction and occupancy, time of day, and collapse pattern, so that search areas are established and victims can be located. You MUST verbally describe those skills which cannot be accomplished hands on.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

DEVELOP A COLLAPSE RESCUE INCIDENT ACTION PLAN

JPR: NFPA 1006-2013 edition, Section 9.1.3

-Jones and Bartlett, Brannigan’s Building Construction for the Fire Service, 4th Edition
-Jones and Bartlett Learning, Emergency Medical Responder, 5th Edition

Candidate Equipment Required: Appropriate PPE
Evaluator Equipment Required: Appropriate PPE

Read to Candidate:
For this skill event, you will develop a collapse rescue incident action plan, given size-up information and a light frame collapsed structure, so that initial size-up information is utilized, an incident management system is incorporated, existing and potential conditions within the structure and the immediate periphery are included, specialized resource needs are identified, work perimeters are determined, collapse type/category and associated hazards are identified, construction and occupancy types are determined, incident objectives are established, and scene security measures are addressed. You MUST verbally describe those skills which cannot be accomplished hands on.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt 2nd attempt
____ ____ 1. Correctly interpreted size-up information.
____ ____ 2. Correctly implemented an incident management system.
____ ____ 3. Monitored changing conditions specific to the incident.
____ ____ 4. Determine construction and occupancy types.
____ ____ 5. Identified specific incident security requirements.
____ ____ 6. Create written documentation.

STABILIZE A COLLAPSED LIGHT FRAME STRUCTURE AS A MEMBER OF A TEAM

JPR: NFPA 1006-2013 edition, Section 9.1.6

-Jones and Bartlett, Brannigan’s Building Construction for the Fire Service, 4th Edition
-Jones and Bartlett Learning, Emergency Medical Responder, 5th Edition

Candidate Equipment Required: Appropriate PPE

Evaluator Equipment Required: Appropriate PPE

Read to Candidate:
For this skill event, you will stabilize a collapsed light frame structure as a member of a team, given size-up information, a specific pattern of collapse, a basic structural collapse tool kit, and an assignment, so that strategies to effectively minimize the movement of structural components are identified and implemented; hazard warning systems are established and understood by participating personnel; incident-specific personal protective equipment is identified, provided, and utilized; physical hazards are identified; confinement, containment, and avoidance measures are discussed; and a rapid intervention team is established and staged. You MUST verbally describe those skills which cannot be accomplished hands on.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt  2nd attempt

1. Selected and constructed shoring systems for collapses in light frame structures.  
2. Used personal protective equipment.  
3. Performed structural load calculations.  
4. Determined resource needs.  
5. Selected and operate basic and specialized tools and equipment.  
6. Implemented communications and safety protocols.  
7. Mitigated specific hazards associated with shoring tasks.

RELEASE A VICTIM FROM ENTRAPMENT BY COMPONENTS OF A LIGHT FRAME COLLAPSED STRUCTURE

JPR: NFPA 1006-2013 edition, Section 9.1.8

-Jones and Bartlett, Brannigan’s Building Construction for the Fire Service, 4th Edition
-Jones and Bartlett Learning, Emergency Medical Responder, 5th Edition

Candidate Equipment Required: Appropriate PPE
Evaluator Equipment Required: Appropriate PPE

Read to Candidate:
For this skill event, you will release a victim from entrapment by components of a light frame collapsed structure, given personal protective equipment and resources for breaching, breaking, lifting, prying, shoring, and/or otherwise moving or penetrating the offending structural component, so that hazards to rescue personnel and victims are minimized, considerations are given to crush syndrome, techniques enhance patient survivability, tasks are accomplished within projected time frames, and techniques do not compromise the integrity of the existing structure or structural support systems. You MUST verbally describe those skills which cannot be accomplished hands on.

This is not a timed event. To pass this station, you must successfully complete 100% of the skill steps.

P-Pass / F-Fail

1st Attempt 2nd attempt
____ ____ 1. Selected, used, and cared for personal protective equipment.
____ ____ 2. Operated rescue tools and stabilization systems.
____ ____ 3. Recognized crush syndrome indicators.

APPENDIX A
IN-HOUSE PROCTOR
INSTRUCTIONS AND REQUEST
FOR CERTIFICATION FORMS
Tester Instructions for “In-House” Comprehensive Examination

As the training officers for your department you are authorized by NDFA to conduct the 100% skills test for this level of certification. You must be certified to the level you are testing, i.e., if you’re FF2 you can test FF1 and FF2, Awareness and HM Operations.

*PRIOR TO CONDUCTING TEST, REVIEW TRAINING RECORDS*
It is important that before doing this “In-House” exam that the candidate has completed training in all areas for the level being tested.

*SAFETY OFFICER SELECTED AND BRIEFED*
Select a Safety Officer to assist you during the test. This person, if possible, should not be taking the same test that is being given. The Safety Officer will not assist with the testing process. The Safety Officer is there to protect the CANDIDATES from injury during the testing process. The Safety Officer shall be in a position to observe all students and ensure their safety at all times during the testing procedure. By using the following instructions you will be able to evaluate the skill being tested and determine the candidate’s readiness for the State “Spot Check” exam.

1. Keep in mind this is a test and there should be no coaching or training during the testing process. If a candidate fails to perform a skill, it will count as a first attempt failure and they will be given a second attempt. If they fail a second time they need to be retrained on that skill and tested again. Only qualified candidates that have passed with 100% should be allowed to take the State SPOT CHECK exam. Before beginning the testing process meet with all candidates and review the testing process. Explain that this is a test and that the same process being used for the “In-House” will be used during the state exam.

2. Designate a secure location for the candidates to remain in while the “In-House” exam is conducted. This location should be away from the area where the exam is being conducted.

3. If possible, separate your testing stations so candidates cannot observe each other during the test.

4. To evaluate a candidate’s performance, use the following as a guide.

   a. the skill is completed in the allotted time,
   b. competence is shown by completing all performance criteria,
   c. safety is shown while completing the skill.

At each test station the tester will read the SKILL to be demonstrated, the CONDITIONS to be met and the TIME limit to complete each skill. This information is contained in the skill section of each standards packet. Do this with each student as they come to each testing station. Ask for any questions. As each skill is tested and completed sign it off in the section provided on the candidates training record. By conducting the “In-House” test in this manner, you will prepare your candidates to successfully pass the state “spot check” exam. This will also assure training records are current and that only those who are truly prepared take the state certification examination.
## EXAMINATION REQUEST / CERTIFICATION REQUEST FORM

Please complete all information on BOTH sides of this form and return to the NDFA at least **30 days prior** to the requested examination date. **A separate request MUST be made for each level of certification exam desired and for each exam date.** Phone Number: 701-222-2799. FAX: 701-222-2899.

### Certification Request

The following department or agency requests that the North Dakota Firefighters Association certify the individuals listed on reverse side of this form. **NOTE: The original “Training Record” of the individuals must be sent with this form - if the “Training Record” has not been presented to the NDFA during a “Spot Check Skills” testing event. Please keep a copy of the “Training Record” for your files.**

By my signature below, I attest that the individuals listed on the reverse side of this form have completed all requirements for certification as defined in the North Dakota Firefighters Association Certification Policy and Procedures Manual.
